

If the children want to mould the sand and shape it as they like, Rådasand can deliver play sand for sandboxes.

Thanks to the rounded shape of the small sand grains, the sand is soft and smooth to play with and does not stick to the clothes as easy as ordinary sand, why it is easy to sweep away.

The play sand can also be used in cultivation of plants in ponds, as way sand for tiling or other places in the garden where you need to adjust the ground.

At climbing frames, swings or other playground equipment we recommend to use Rådasand shock-absorbing playground sand instead of play sand for sandboxes. This sand is especially developed for use under playground equipment where there is a risk of falling. Rådasand shock-absorbing playground sand meets the EU requirements for playgrounds.

The sand box sand can be delivered in plastic sacks of 25 kgs or in big bag.

Rådasanden in natural size in dry (top) condition. Colour reproduction may vary due to printing process used.

Product specification sheet: Sand box sand 0-6 mm, rev 1.0.
Contains basic technical data. Rådasand AB reserves the right to change specifications without giving prior notice.

Please contact us if you want further information of the sand from Rådasand, get references or ask for a sample delivery.
